**Novelties from Spanish Group**

# Spanish Association of Cleaning and Hygiene Manufacturers. ASFEL

## About ASFEL

ASFEL is the Spanish Association of Cleaning and Hygiene Manufacturers. It's a non-profit trade association that has been **representing the interests of Spain's cleaning and hygiene industry** for more than 15 years.

ASFEL is **officially recognized** by the Spanish Foreign Trade Institute as main collaborating institution of the public administration for the cleaning and hygiene sector.

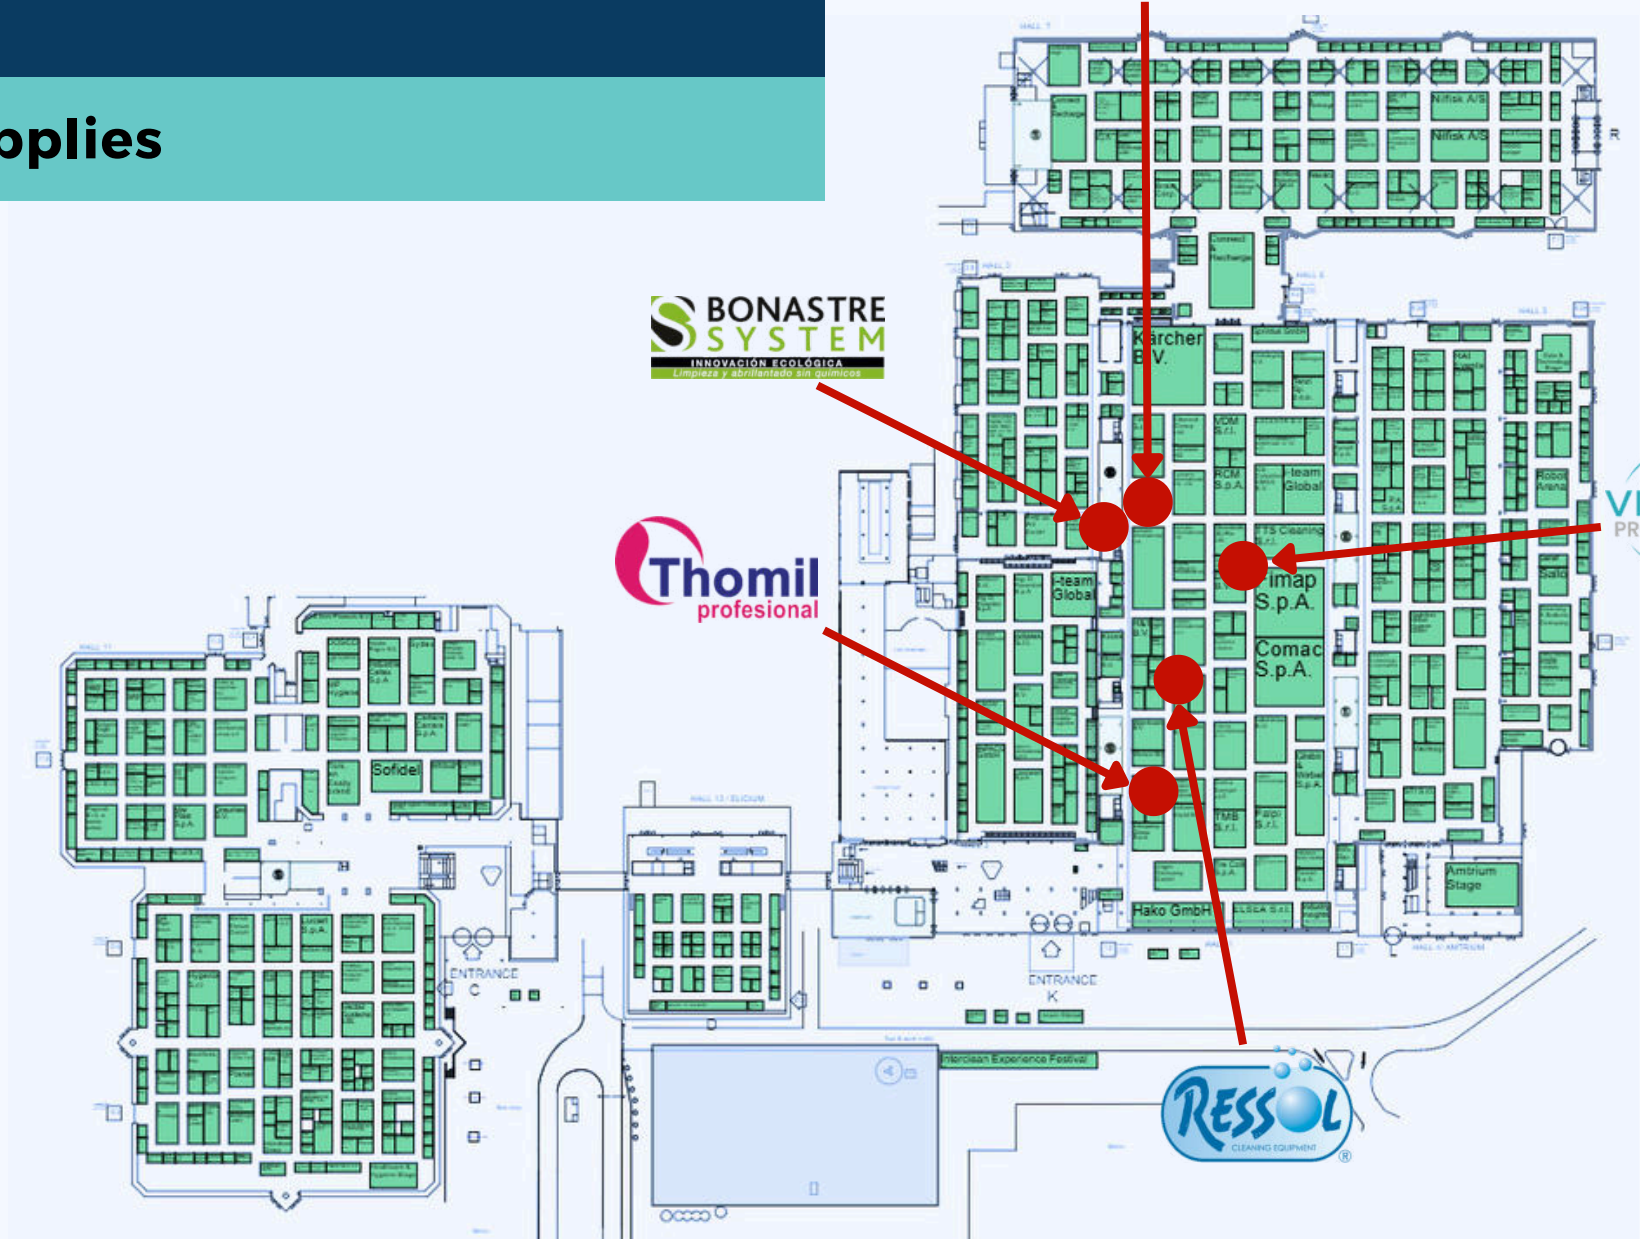

Main objective of the association is to **source out new trade opportunities in overseas markets** and to promote and strengthen the presence of Spain's cleaning and hygiene companies abroad. In order to accomplish this mission, every year ASFEL, with the support of ICEX - the Spanish Foreign Trade Institute -, develops a specific Promotional Sectorial Plan for the cleaning and hygiene sector.

The Board of Directors of ASFEL, made up of CEOs of the Spanish Cleaning and Hygiene industry, establishes the strategic lines of the association.

The Spanish participation at InterClean is organized by ASFEL, who guides and helps the SMEs in order to have a **better participation** at the show and does a **wide promotion** of the Spanish participation. ASFEL will and have an information booth, located in **Hall 3 Stand 510** during the InterClean show.

## Cleaning supplies

# SUCITESA

[www.sucitesa.com](http://www.sucitesa.com)

**SUCITESA** is proud to introduce their latest innovations in **professional hygiene**, combining **efficacy and sustainability** in three groundbreaking ranges: NaturSafe PLUS, NaturSafe XTRA, and the SMART GREEN SYSTEM. All are backed by the EU ECOLABEL guarantee and certification.

**NaturSafe PLUS** is notable for its focus on waste reduction and efficient resource use, offering highly concentrated and biodegradable versatile solutions. The color-coded system simplifies its use and enhances business safety and performance.

**NaturSafe XTRA**, in addition to being the diluted version of PLUS, includes products such as hand soaps and dishwashing liquids that are not only effective but also gentle on the skin and the environment. This range assists businesses in achieving and maintaining the most stringent environmental criteria.

The **SMART GREEN SYSTEM** is their answer to the need for precise and ecological dosing, significantly reducing product consumption and environmental impact. With 85% less use of plastic and reduced CO2 emissions, this modular system is an exemplar of innovation and sustainability in the professional cleaning field.

These product lines reflect their commitment aligned with their values of **The Cleanest Project**.

BOOTH 132

# THOMIL

[www.thomil.com](http://www.thomil.com)

**Thomil**, with over 70 years of experience, offers a wide range of **products for cleaning and hygiene professionals**. At InterClean 2024, Thomil will present groundbreaking innovations that are more cost-effective and sustainable.

Their **MASTERBOX** range features ultra-concentrated products in a **bag-in-box format**, including more options for surface cleaning, dishwashing, and professional laundry. Thomil also introduces new Ecolabel products.

The **THOMILMAGIC DOSE** offers a complete range of concentrated cleaning solutions in self-dosing bottles.

Thomil is expanding the **THOMILMAGIC SMP** range with more concentrated cleaning solutions, providing customers with significant cost and space savings, increased safety, and precise dosing with a single dispenser for all products in the range, making work easier.

These are major innovations that revolutionize conventional cleaning.

# HILADOS BIETE

[www.hiladosbiete.com](http://www.hiladosbiete.com)

**Hilados Biete** has been in the textile manufacturing industry for over 40 years, specializing in the manufacture and marketing of **professional cleaning products**. It stands out for selecting the best materials and using advanced production methods along with rigorous quality controls to provide innovative cleaning solutions. It offers a wide range of products within the professional cleaning industry. The company adapts to market needs, adjusting costs to maintain the competitiveness of its distributors and their end customers, establishing itself as a sales leader and continuously expanding its catalog with new and effective cleaning methods.

Hilados Biete-Ressol Will be presenting several **novelties**.

- **Microfibre MicroSup** cloth made of microfibers and covered with a layer of resin that allows optimal results and drying capacity without leaving a trace. Maximum absorption and cleaning capacity thanks to its special polyurethane coating. Now available in 4 colours.
- Also presenting a **wide range of dustbins and containers** in code color in order to recycle. Different sizes (from 9 litres to 250 litres).
- **Manufacturers of Industrial wet mops** in different materials; microfibre, recycled cotton and synthetic materials.

# VINFER PROFESIONAL

[www.vinfer.com](http://www.vinfer.com)

**Vinfer Laboratories** has been established for more than 50 years as manufacturers with extensive experience in the production of insecticides, particularly in the professional sector. Their professional range of insecticides is designed to meet all the needs associated with pest treatment and insect control in hotels, restaurants, and more. They offer **specialized insecticides** in both aerosol and liquid formats for flying and crawling insects, as well as multi-insect solutions.

They are introducing the new **Wins Concentrates**, an innovative cleaning solution designed to save on plastic, logistics, transport, space, and cost. The new Wins cleaners concentrate all the **cleaning power** in a 250ml format by using only the active ingredients in the formula, leaving out the water. The products are diluted for use in a reusable bottle with 4.75 liters of water, making the final product in 5L.

# INDUQUIM

[www.induquim.com](http://www.induquim.com)

**Induquim** is a leading company within the **professional cleaning and hygiene sector**, known for its process profitability and close customer relationships through personalized programs. The company places strong emphasis on continuous development and investment in R&D, which ensures the innovation and sustainability of its products. Its commitment to efficiency and quality makes Induquim a leader in the industrial hygiene market.

At InterClean, they will present the **Wellness Nature System**. A **SUSTAINABLE and EXCLUSIVE** washing system for washing hotel linen. This is a neutral system with state-of-the-art technology with biological Polymers that works at low temperatures and does not produce polluting discharges as it does not use chemical oxidants. It uses two ultra-concentrated products and very tight dosages and produces a significant reduction in the carbon footprint.

Wellness Nature respects the fabrics without damaging the fibers in such a way that the maximum number of washes is achieved without having to replace the lingerie. Furthermore, by not using chemical oxidants, a direct benefit is generated in the machinery used and in the hands of the operators.

- Demil – Liquid detergent for hotel linen.
- Suamil – Hotel linen conditioner.

# IK SPRAYERS

[www.iksprayers.com](http://www.iksprayers.com)

**IK Sprayers**, part of the Goizper Group, is a leader in the manufacturing of **spraying systems for industrial sectors**, offering innovative and robust products for construction, automotive, food industry, and more. It stands out for its commitment to quality and its focus on **customer-oriented innovation**. Through its global network, IK Sprayers reaches over **110 countries**, providing solutions that enhance the efficiency and safety of professionals worldwide.

During InterClean, they will present the new models **IK UPSIDE-DOWN SPRAYERS** and the **IK BATTERY COMPRESSOR**:

**New IK Multi 360° range composed of 3 sprayers:** 2 trigger sprayers with capacities of 1 liter and 0.6 liters, and 1 pressure sprayer with a capacity of 1.5 liters. These sprayers are ideal for applications on small surfaces and hard-to-reach areas. Their 360° system with full rotation allows an upside down spraying for a more ergonomic, efficient, and precise spraying in areas that require a different spraying angle in cleaning and disinfection. IK Multi sprayers are particularly resistant to most acids, solvents, and disinfectant products.

**The IK Sprayers compressor is powered by a 18V battery with a level indicator**, enabling users to effortlessly pressurize it up to 2.5 bar quickly. With its high airflow, continuous operation can be sustained while maintaining pressure. This electronic accessory is compatible with the following IK models with compressed

# CLAR SYSTEMS

[www.clarsystems.com](http://www.clarsystems.com)

**CLAR SYSTEMS** specializes in industrial hygiene in Alicante. They are expert manufacturers of **products for equipment**, hygiene, and industrial cleaning, with sales exclusively to distributors and specialized professionals. Their commitment to innovation and sustainability allows them to have a broad international presence, exporting to more than 50 countries.

**BELA soap dispenser.** An exceptional soap dispenser thanks to its ability to adapt to various needs. With a single housing, we offer the possibility of having up to 6 different soap dispensers, simply by changing the inner seat and the valve. This feature not only saves resources, but also allows the possibility to reuse the same valve by replacing only the reservoir, which is made of recycled PE. Providing flexibility to users and allowing them to customise their experience according to their preferences.

The "**Autocut KYRA**" is a tangible demonstration of our dedication to the circular economy and the reduction of plastic waste. With every unit manufactured, we are contributing to a reduced environmental footprint by using 100% LG certified recycled plastic. This initiative reflects our commitment to environmental responsibility by reusing materials and closing the life cycle of products.

They will also display a **central paper towel extraction device** that reduces waste and the **I-Nova soap dish**, made from recycled plastic. These innovations highlight their leadership in modern and sustainable hygiene solutions.
